

# THE PET SHOP JUST MADE FOR YOU

---

Designer - Shopfitter - Pet store producer

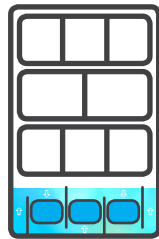

## Aesthetics & savings

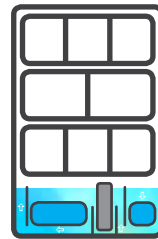

LED lighting

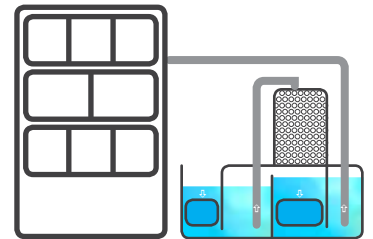

RAL colours

Settling filtration

Independent unit

Centralized units

## Bettas & shrimps

As part of the entire set-up or as a separate unit, these units are specially designed to highlight your bettas & shrimps. The small tanks are removable and very low maintenance.

Moreover, their LED lighting has very low consumption.

# Freshwater & seawater

We use our filtration systems in the HP AQUARIUMS set-ups of our own pet shops. This ensures our hands-on knowledge concerning maintenance problems of fresh- and seawater set-ups as well as plant containers.

We developed a unique system that reduces maintenance time of HP AQUARIUMS set-ups by 70% compared to standard set-ups, as shown by comparative studies. Set-up maintenance is essential but also very time-consuming for sales persons, preventing them from tending to customers. At the same time, customers become more and more demanding when it comes to the set-up's aspect. HP AQUARIUMS set-ups mean reduced maintenance time and customer-dedicated staff!

Furthermore, we use low consumption pumps in our installations, our lightings work with electronic ballasts allowing substantial savings in terms of electricity consumption and lighting tubes.

## Customized decors

Pick your photo

We optimize it for your project

Printing + protection

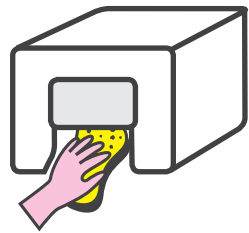

## Ponds

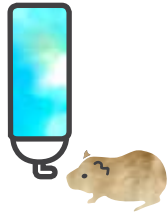

Aesthetic and adjustable, our pond units are very low maintenance and guarantee healthy fishes due to our UV-C POWER EXTREM system.

In standard or customized size, these units highly reduce fish loss and ensure a better profitability to your store.

Cleaning friendly with trapdoor

Feeding bottle and hayrack

## Small mammals

All our rodent units are made for intensive use. We adapt our set-ups to animals' specifics as well as professional requirements. We gather your ideas and our know-how to create a functional and eye-catching space for rodents.

## Reptiles & turtles

Each species needs an optimal environment to thrive (temperature, humidity, specific habitat). Our terrariums are designed for easy maintenance and each one of them is equipped for tropical as well as desert reptiles.

## Birds

Imagine a roomy and agreeable bird sales area. Our standard bird cage units and custom made aviaries are designed for the animal's well-being with a careful choice of materials and unit disposition to facilitate cleaning.

## Equipments

Dirtiness only in bird feeders

Anti-pecking perches

Permanent water replacement

# Let us introduce ourselves

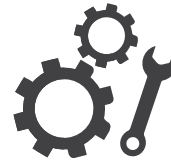

Our company is specialized in pet shopfitting business for more than 20 years. We are among the very few manufacturers running their own pet shops in the East of France, which allows us to test our products and provide a constant technical improvement. Today we export our production to many countries such as Germany, Austria, Netherland, Spain and Malaysia.

## A project?

Tell us about your projects and we will bring them to completion with you. Our company has its own design office that is equipped with 3D softwares, a graphic studio and a production unit.

Shopfitting, 3D design of your installations, decor creation and printing, cost calculation, in-house manufacturing, on-site installation... The quality we provide is the fruit of our teams' know-how and coordination skills.

## « Building future is a daily task »

We are operating in a very specific market and working in France, in Europe and in Asia. We are proud to export the French «savoir-faire»! On an everyday basis, we improve our production process, the technology of our filtration systems, the energy consumption of our units...

We are continuously innovating because our main motivation is to guarantee an optimal well-being to every pet. Moreover, from now on we are the European leader in matters of centralized filtration system of aquarium units.
